Why Patient Room Boards?

Our research shows a properly designed dry erase board can help improve patient satisfaction and HCAHPS up to six points; it also encourages patients to become more involved in their own treatment. Keeping nurses, patients and family members included in the care plan encourages patient engagement, increases patient understanding, and improves overall satisfaction.

Placement
Placement in the room is integral to boards achieving communication initiatives and being incorporated into the clinical care pathway.

Aesthetics
Custom sizing, frames, colors and graphics allow custom patient room boards to complement any design and hospital branding.

Cleanability
Our surface is easy to clean and also protects against ghosting and fading, allowing nurses to write clearly and erase completely.

Why Healthcare Facilities Choose VividBoard

Customizable
All products are produced to your exact specifications with your branding.

Sustainable
VividBoard is focused on the environment. We use up to 70% of recycled materials, our coating and printing process is VOC free, and we are CARB compliant.

Made in the USA
We’re proud to be made in the USA. All VividBoard products are manufactured in Lebanon, Ohio and delivered nationwide.

Long Lasting
All VividBoard products carry a limited lifetime warranty against ghosting and fading.
Change Made Easy

Swing Changeable Glassboards are the solution when the ability to easily change care plan communications are needed.

With the look of permanent graphics, the single or double-sided interchangeable insert makes the board flexible, perfect for the ever-changing healthcare environment.
